

STORAGE DEVICE

XORAYA ESU

The XORAYA ESU is an external storage device specially designed for XORAYA data loggers.

PRODUCT OVERVIEW

Description

The External Storage Unit (ESU) allows large amounts of log data to be stored. It works like an external hard disk and has the advantage that no storage space needs to be freed up on the data logger between test drives. The data can be conveniently used via the XORAYA Datacube or any XORAYA data logger with an storage interface.

Product Highlights

- ✓ Stores up to 8 TB log data
- ✓ Compatible with all XORAYA data loggers with external storage interface
- ✓ Data can be downloaded via XORAYA Datacube or data logger
- ✓ No additional power supply required

Technical Data

All important technical data of the XORAYA ESU at a glance:

Storage capacity	Temperature range	Dimensions
Up to 8 TB	-40 °C to +65 °C	32 x 107 x 132 mm
